## PA1 report

2.(b)

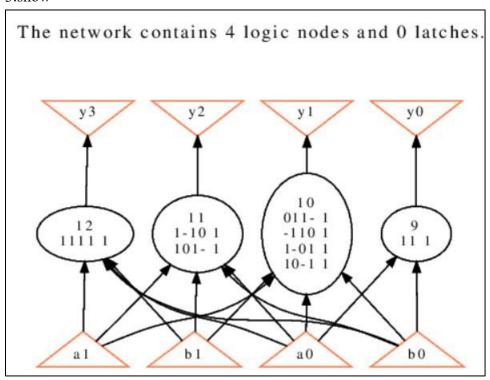

1.read

abc 01> read mul.blif

2.print\_stats

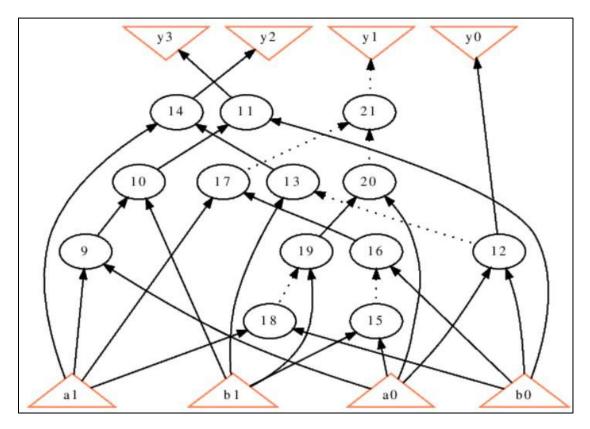

3.show

4.strash

abc 02> strash

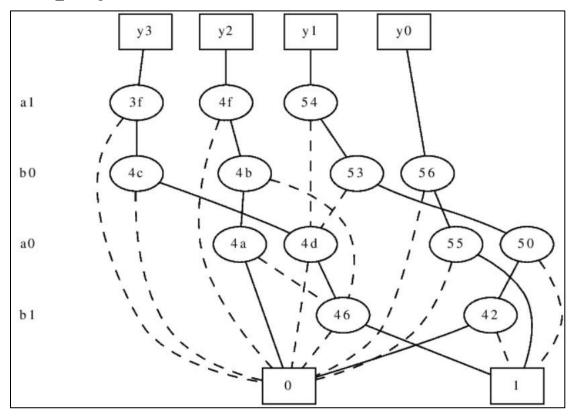

5.show

6.collapse

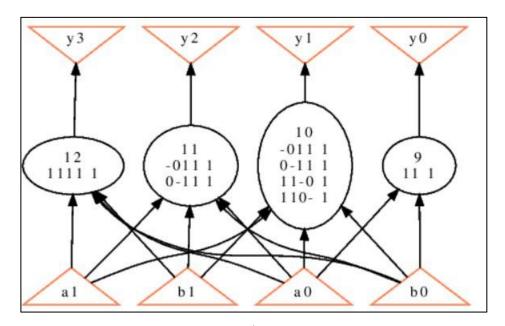

## abc 03> collapse

7.show\_bdd -g

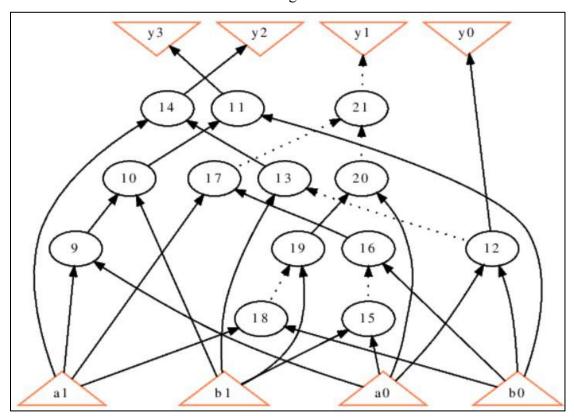

3.(a) 1.aig vs. strash

上圖為 aig,而下圖為 strash。差別在於 aig 與 read blif 檔完之後的結果相近,而 strash 完之後的結果是 structural hash 過產生的 aig。

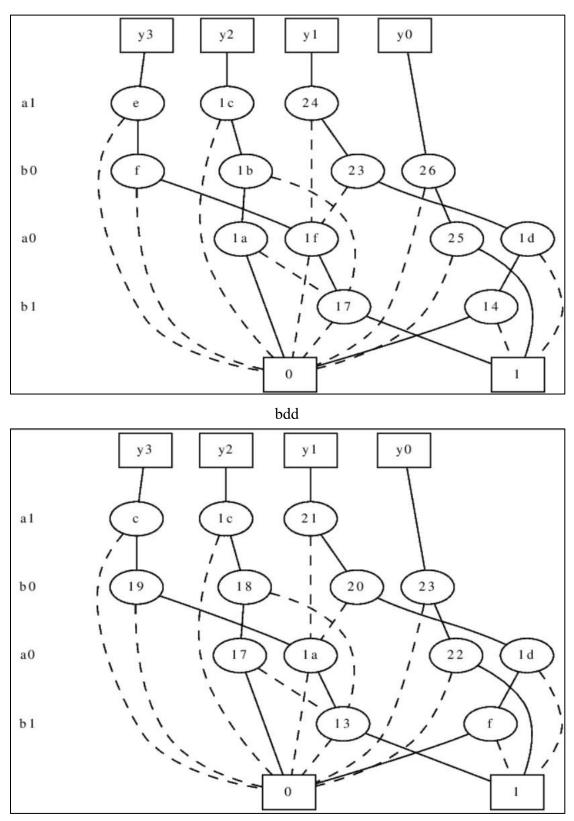

aig

strash

## 2.bdd vs. collapse

bdd 與 collapse 完的結果相近,也與 read 完 blif 後直接 show\_bdd -g 相近。

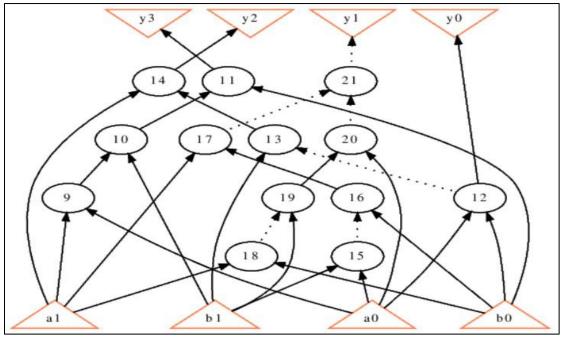

collapse

3.(b)

1.read mul.blif

2.strash

此時結果為 structural hashed aig,如下圖

3.renode

renode 完即達成題目所求,結果如下圖。
